HELLO KATELYN!

With my partners at United Readers, I present "Summer at the Lake," a mural that celebrates the most iconic and beautiful scenery that Lakewood has to offer: Lake Erie viewed from the Solstice Steps! We want to highlight the natural wonder that is Lake Erie and its flora and fauna. We also want to celebrate Lakewood's diverse population. We love our city and all of the elements that make it the best place to call home! Our proposed mural would cover most of the United Readers west-facing wall at 13400 Madison Ave.

Design pictured is a sketch, not final art. The people, pets, boats, etc, are just quick sketches, but if it were to be selected I would add details and clean everything up. Due to the many small details in the design, I think a brick wrap installation will be best.

See below for our proposed project budget.

PROPOSED PROJECT BUDGET: \$7,500 Total (United Readers to provide \$2,500 of total)

- DESIGN FEE: \$1,824
- FABRICATION FEE: \$5,676
- INSTALLATION METHOD: Brick wrap to be installed by Inflatable Images.

Thank you for your consideration.

Sincerely,

Stephanie Crossen

SPECTACULAR VERNACULAR "SUMMER AT THE LAKE" PRELIMINARY CONCEPT SKETCH

Design pictured below is a sketch, not final art. The people, pets, boats, etc, are just quick sketches, but if it were to be selected I would add details and clean everything up. Due to the many small details in the design, I think a brick wrap installation will be best.

PROPOSED BUDGET

\$5,376 Brick Wrap

\$300 Lift Rental

\$1,824 Design Fee

\$7,500 TOTAL

PRELIMINARY CONCEPT SKETCH RENDERED ON UNITED READERS WEST FACING WALL @ 13400 MADISON AVE.

WE LOVE THIS NEW OPTION. CUTTING THE CORNER ADDS A SENSE OF DYNAMIC MOVEMENT AND PLAYFULNESS.

IT ADDRESSES YOUR CONCERN OF MAKING THE PIECE MORE VISIBLE FROM THE ROAD BY BRINGING IT UP AND OVER. IT FULFILLS OUR GOAL OF FILLING UP THE BLANK WALL ON THE LEFT SIDE AND BALANCING OUT THE COMPOSITION OF THE BUILDING.

****Please note that this is only a sketch. The final version will be more refined, balanced, and rich with detail.

THE MURAL WILL BE DRAWN IN A MODERN STAINED GLASS STYLE, THAT HIGHLIGHTS THE COMMUNITIES CONNECTION TO NATURE. THE ARTWORK WILL BE BRIGHT HIGH CONTRAST COLORS ENCASED IN A THICK LINEWORK.

THE SCENE FEATURES 4 SPOT ILLUSTRATIONS EACH SHOWING A DIFFERENT DAY OF CREATION. THESE ARE ENCASED IN A STONE FRAMEWORK THAT IS SURROUNDED BY TREES, RIVERS, AND OTHER PLANT & WILDLIFE SCENERY.

Light beams shine through gaps in the stonework and trees.

Illustrated stonework architecture lines up with the natural shape of the building.

Mural tapers into the cuyahoga river which flows through and around the structure.

Treetop Canopy goes onto raised sections making it look like the artwork extends past the canvas.

The 4 scene drawings are set below stonework, which is overgrown and obscured by the foliage.

The tree and animal species seen in the artwork will be drawn to match those found in the community.

Light into darkness
(Sky scene with clouds
birds and light beams)
(day 1-2)

Togetherness/Community
(community event scene
in front of building)
*day 6

Caring and compassion for the environment and each other.
(couple walking together
through crops)
*day 5

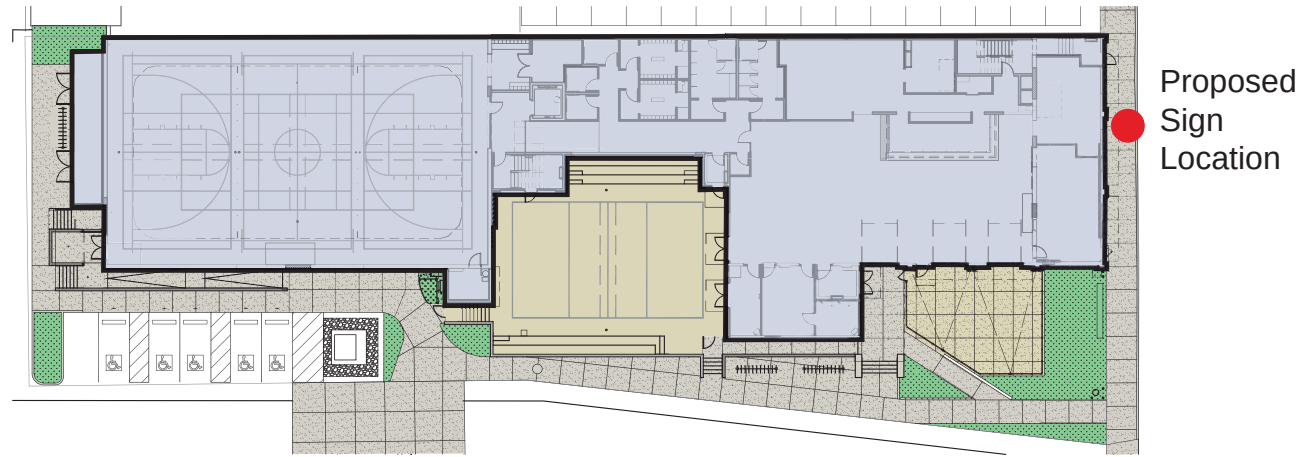

Beauty of nature/landscape
(riverbank with figure gazing
up at sky)
*day 3-4

EXAMPLE OF A SKETCH (PG 1) COMPARED TO THE FINAL PRODUCT:

The Fieldhouse @ Studio West 117

ARB Signage Package- Proposed Mural & Blade Sign

The Fieldhouse @ Studio West 117

Hi Michelle,

I spoke to the artist and I have answers to the questions Katelyn asked below in red. Thank so much for this opportunity. Hope to hear back soon.

"Hope you are having a great summer. Sorry for the delay on this. I was hoping to get additional details on the below questions.

1. Can the artist send any photo examples of this type of wood on the exterior of the building and how it looks after a few years? There is some concern with how it will look over time as it is exposed to the elements so any photos or other local examples to go see are helpful. **We do not have any photos of exterior. The artist will be using a pine that is thermally treated. Shu sugi ban method (art form of torching the wood to create a black finish that is also water & insect proof) Burnt wood siding is a traditional Japanese siding treatment. Called "Shou Sugi Ban", the wood is charred with fire, then finished out with Tung oil. Interestingly enough, this process actually makes the wood fire resistant and bug-proof. Burnt wood siding will last over 100 years without any kind of maintenance. Pieces will be sealed and mounted individually like puzzle on marine grade plywood (exterior graded). There will be a waterproof barrier between the plywood and exiting brick building. All screws and hardware will be exterior graded. Not only will this piece be protected from the elements it will also be eco friendly. We intend to install a modern awning that will help protect the piece from the elements and also add to the design.**
1. For the corner treatment, they're wondering if the end will be capped by metal as shown in the screenshot below or if it will just end with the rough ends of the wood. If the artist can provide a description of how they physically plan to address the end of the wood pieces at the corner of the building that would be what the task force is looking for. **The end pieces will be customize made out of metal to protect the edge.**

Once we get answers we will discuss this at the next public art task force meeting. Please coordinate with Michelle moving forward, as I will be out of the office.

Katelyn

Katelyn Z. Milius, P.E.
Assistant Director

We will seal the art piece every other year or as needed to maintain the integrity of the art. The total cost for the art & install will be \$19,000. I truly think this will be a beautiful addition to Sloane Ave & the west end.

Cheers!

Kristen
